EDUCATION

2013-2020	Ph.D. in Electrical and Computer Engineering Advisor: David S. Ebert Thesis title: Visual analytics for decision making in performance evaluation	Purdue University, West Lafayette, IN, USA
2011-2013	M.S. in Computer Science Master project: Modeling user interactions for complex visual search tasks	Tufts University, Medford, MA, USA
2010-2011 2006-2010	M.S. Candidate in Computer Science & Technology Bachelor of Engineering in Software Engineering Thesis title: Natural scene construction and rendering of rain and snow	Zhejiang University of Technology, China

HONORS AND AWARDS

2020	Award for Effectively Transforming Task Decomposition into Conceptual Design of VAST Challenge, IEEE
2015	Honorable Mention for Compelling Narrative Debrief of VAST Challenge, IEEE
2010	Excellent Graduate awarded by Zhejiang Provincial Higher Education Council
2007, 2008, 2009	Excellent Student Scholarship awarded by Zhejiang University of Technology
2008	Outstanding Student awarded Zhejiang University of Technology

RESEARCH EXPERIENCE

Arizona State University VADER Lab

Postdoc Research Associate with Dr. Ross Maciejewski

2020-present

- 2022-2023 **Exploring the potential of explainable artificial intelligence in repairing trust**
Examining the effectiveness of visual explainable AI in repairing trust in a high-throughput, high-stakes, and AI-enabled human-AI teaming environment following a trust violation
Relevant publications : W3
- 2021-2023 **Using visual Analytics to aid in the detection of transition regions in molecular dynamics simulations**
Utilizing data-reduction and progressive visualization techniques for responsive exploration and identification of critical transition regions in large-scale molecular dynamics simulations
Relevant publications : W2
- 2021-2022 **Quantifying the benefits of human interactions in an interactive label correction system**
Measuring the upper bound of human involvement in a human-machine teaming system such as label cleaning to improve the quality of a training dataset
Relevant publications : W1
- 2020-2021 **Evaluating the impact of uncertainty visualizations on humans' reliance on predictive models**
Investigating the presence of estimated uncertainty of a prediction provided by an artificial intelligence or machine learning model can enhance or undermine human adoption behavior of model predictions
Relevant publications : J8

Purdue University VACCINE Lab

Graduate Research Assistant with Dr. David S. Ebert

2013-2020

- 2016-2020 **FeatureExplorer: Visual analytics for automated sorghum phenotyping and trait development**
Visualizing the remote sensing data collected by a UAV-based platform. Incorporating the feature engineering pipeline of remote sensing experts to improve the prediction for phenotypic traits of energy crops.
Relevant publications : C5, C4, C3
- 2015-2020 **MetricsVis: Employee performance evaluation and analysis for law enforcement officers**
Collaborating with local law enforcement officers to exploit their automatically logged activity records. Utilizing dynamic evaluation metrics to understand the impact of behavior types, shifts, and patrol districts.
Relevant publications : J6, J4, C2

- 2014-2015 **Route Packing: Geospatially-accurate visualization of route networks**
 Displaying several routes simultaneously on a geographic map while preserving the geospatial layout, identity, directionality, and volume of individual routes.
 Relevant publication : C6
- 2013-2014 **VASA: Interactive computational steering of large asynchronous simulation pipelines for infrastructure**
 Designing a workbench connected with several distributed servers that model the impact of societal threats such as weather, food contamination, and traffic on critical infrastructure such as supply chains, road networks, and power grids. Relevant publication : J2

Tufts University VALT Lab

Master Project with Dr. Remco Chang

2011-2013

- 2011-2013 **Modeling user interactions for complex visual search tasks**
 Investigating the interaction patterns of users while performing search tasks. Utilized *Where's Waldo* as a representative example of visual complex search tasks. Relevant publications : J1, P1

TEACHING EXPERIENCE

- Summer 2021 Mentor for five high school students in the seven-week VADER Lab summer research camp
- 2018, 2019, 2020 Graduate Mentor for three students who received scholarships from Purdue's Discovery Park Undergraduate Research Internship (DURI) Program
- Fall 2018 Teaching Assistant for Purdue's Introduction to Visual Analytics ECE695D
- 2014, 2016, 2017 Graduate Mentor for three students in the Summer Undergraduate Research Fellowship (SURF) internship
- 2015-2020 Graduate Mentor for eleven undergraduate students participating in the Vertically Integrated Projects (VIP)
- Spring 2012 Teaching Assistant for Tufts's Introduction to Programming for Business COMP10
